IDA Ireland

Disruptive Technologies Partnering Portal

What are Disruptive, Digital and Sustainable Technologies?

Disruptive, Digital and Sustainable Technologies are those that have the capacity to "disrupt" or alter markets and the way businesses operate. They often involve new products and services and the emergence of new business models. Some popular examples include AI, digital currencies, VR, 3D-Printing. Furthermore, by combining, such technologies with "green" solutions, such as renewable energies, we can help migrate carbon-intensive operations towards a more sustainable future.

Looking for a partner on your next business venture? Discover what Ireland can offer.

The portal is available to all Irish based companies to join. Simply register your company and invite your colleagues.

Register at: **DTPP.IE**

The **Disruptive Technologies Partnering Portal** is a collaborative space where all companies based in Ireland can promote, source or partner around disruptive, digital and sustainable technologies. Helping them adapt to the ever-changing landscape of the business world.

The portal allows you to:

Find Business Partners and Directly Source Solutions

Browse from a comprehensive list of service providers with expertise and advanced solutions that match your specific business needs. Set your partnering preferences when you register.

Broadcast Partnership Opportunities and Signal Your Needs

Looking for a partner to help you deploy a new solution and not sure what the right solution to your challenge is? Signal partnership opportunities or your specific needs on your profile and let service providers come to you.

Promote your Disruptive, Digital and Sustainable Solutions

Do you have advanced or sustainable solutions you would like to promote? Join solution providers across Ireland in showcasing their niche and specialist capabilities.

Join and Engage the DTPP Community

From partnership opportunities, grant/financial supports, research projects and more, explore what other users are discussing on the DTPP forum and join the conversation.
